

Required Assignment 1.2: Applications of AI

[Start Assignment](#)

Due Apr 15 by 11:59pm Points 25 Submitting a file upload Attempts 0 Allowed Attempts 1 Available after Apr 8 at 12am

Learning Outcomes Addressed

- Analyse the application and use of various AI methods within an organization
- Evaluate how AI can be utilised in managerial functions

Assignment Instructions

Leverage the knowledge gained from the module and answer the following questions. Provide detailed responses, drawing from the concepts discussed in the module. Each question requires an analytical approach and application of the theories and frameworks introduced.

Questions:

1. AI and competitive advantage

- Describe how you can use AI to enhance the competitive advantage of your company. Think beyond just automation. Which new opportunities can it unearth and what challenges will it involve? How will those initiatives align with your company's key strengths? Which new capabilities, both technological and managerial, do you need to acquire in the short and long term?

2. Aligning AI to Strategy and Organization:

- Describe how you would align AI initiatives with the overall strategic goals of your organization. Provide a specific example to illustrate your approach.

3. Leadership and AI Advocacy:

- As a senior leader, how would you advocate for AI adoption within your organization? Discuss the key steps you would take to promote AI-friendly policies and practices.

4. Creating a Healthy Data and AI Culture:

- Explain the importance of creating a healthy data and AI culture within an organization. What strategies would you employ to foster such a culture?

5. Scaling AI in Organizations:

- Discuss the challenges and best practices for scaling AI in an organization. Provide an example of a successful AI scaling initiative and what made it effective.

Required Assignment 1.1: AI Implementation and Data Analysis

Criteria	Ratings			Pts
AI and Competitive Advantage	5 pts Exceeds Expectation Provides a comprehensive description of how AI can enhance competitive advantage, exploring new opportunities, challenges, and alignment with company strengths. Demonstrates a clear understanding of required technological and managerial capabilities.	3 pts Meets Expectation Describes how AI can enhance competitive advantage with a general exploration of new opportunities, challenges, and alignment with company strengths. Identifies some required capabilities.	0 pts Below Expectation Provides a limited or unclear description of how AI can enhance competitive advantage. Lacks exploration of opportunities, challenges, and alignment with company strengths. Limited understanding of required capabilities.	5 pts
Aligning AI to Strategy and Organization	5 pts Exceeds Expectation Thoroughly explains how AI initiatives align with strategic goals, using a specific and relevant example.
