 Learning Outcomes Addressed

- Explain the benefits of different AI technologies for different sectors and functions
- List industry examples of the use of machine learning

Assignment Instructions

Artificial Intelligence (AI) and Machine Learning (ML) use cases span various domains, as discussed. Below is a summary of these use cases across different sectors.

- Identify and fill in the applicable ML technique (Supervised, Unsupervised, or Deep Learning) for each use case.
- List the relevant data features required to solve each use case.
- Describe the business impact of each use case.

Use cases	Domain	ML Supervised / ML Unsupervised / Deep Learning (Predominantly applied technique)	Data	Business impact
Diagnosis is based on symptoms, diagnostic tests, and experience	Pharmaceuticals	ML Supervised / Deep Learning	Symptoms, diagnostic tests, and experience	- Get early predictions - Proactive diagnosis
Credit scoring	Finance			
Predict which employees are likely to leave	HRM			
Personalized product recommendations	Retail			
Email is Spam or not	IT			
Topic modelling of Movie Reviews	Entertainment			

Required Assignment 2.2: AI and ML Use Cases: Techniques, Features, and Impact

Criteria	Ratings			Pts
Identification of Techniques	5 pts Exceeds expectations Correctly identifies techniques for all use cases with clear justification and multiple relevant techniques if applicable.	3 pts Meets expectations Correctly identifies techniques for most use cases with basic justification.	0 pts Below expectation Incorrectly identifies techniques or provides insufficient justification.	5 pts
Data Features	5 pts Exceeds expectations Provides comprehensive and relevant data features with detailed explanations for each use case.	3 pts Meets expectations Provides relevant data features with basic explanations.	0 pts Below expectation Provides irrelevant or insufficient data features with little or no explanation.	5 pts
Business Impact	5 pts Exceeds expectations Provides detailed and insightful explanations of business impact with specific examples for each use case.	3 pts Meets expectations Provides clear and relevant explanations of business impact with examples.	0 pts Below expectation Provides vague or insufficient explanations of business impact with few or no examples.	5 pts
